- (54) Disc-shaped knife rotary cutter.
- (57) The improved rotary cutter performs cutting by making a knife edge portion of a rotating discshaped knife (2) bite into a surface of a sheet (1) being successively fed. On the underside of the traveling sheet (1), a brush (4) consisting of rodshaped brush elements is fixed on a backing table (3) between point A and point B over the entire region in the lateral widthwise direction of the sheet (1), a knife edge of the knife (2) is disposed close to a front end portion of the backing table (3), upon transfer of the knife in the lateral widthwise direction of the sheet the knife is raised to be disengaged from the brush and the sheet and then it is transferred and set in position. Thereafter, while the knife is being rotated, it is lowered to be engaged with the sheet and again cuts the sheet. In addition, paper powder produced as a result of cutting a sheet is removed by providing a suction box (16) extending over the entire region of the maximum lateral width of the sheet right under the disc-shaped knife (2).

Furthermore, grindstones (26,27 and 29) for grinding the knife edge of the disc-shaped knife are provided so as to be movable in the axial direction of a shaft (11) of the disc-shaped knife (2), and in addition, there is provided a felt (34) immersed in soapy water for peeling off paste from the knife (2).

European Patent Office

C	LAIMS INCURRING FEES	
	,	
The pres	sent European patent application comprised at the time of filing more than ten claims.	
	All claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for all claims.	
	Only part of the claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid.	
	namely claims:	
	No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.	
L	ACK OF UNITY OF INVENTION	-
The Sear	ch Division considers that the present European patent application does not comply with the requirement of unity of	1
	and relates to several inventions or groups of inventions,	
namely:

X	All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims	
	Only part of the further search fees have been paid within the fixed time fimit. The present European search	
	report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid.	
	namely claims:	
	None of the further search fees has been paid within the fixed time limit. The present European search report	
	has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims.	
	namely claims:	

European Patent
Office

EP 93 11 4083 -B-

LACK OF UNITY OF INVENTION A PRIORI

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions.

'

- 1. Claims 1-4,7: rod shaped brush elements supporting a sheet travelling under a disc-shaped knife rotary cutter
- 2. Claim 5: Sharpening device for a disc-shaped knife rotary cutter
- 3. Claim 6: Lubricating and cleaning device for a discshaped knife rotary cutter
